Professional Summary

Computer Science and Engineering student at VIT Vellore maintaining a 9.04/10.00 CGPA, with hands-on software development experience across backend engineering, full-stack web applications, and artificial intelligence. Proficient in Java, Python, C++, SQL, React, TypeScript, FastAPI, and PostgreSQL, with a solid foundation in Data Structures, Algorithms, and Object-Oriented Programming. Demonstrated ability to build production-grade systems during an SDE internship at Shah Softwares by developing REST APIs, integrating databases, and engineering modular UI components. Proven track record of applying advanced CS concepts to real-world projects, including cryptographic biometric authentication systems, NLP sentiment analysis pipelines, and RAG-based AI tools. Driven by a strong focus on building clean, scalable architectures and autonomous AI systems.

Education

Vellore Institute of Technology, Vellore <i>Bachelor of Technology in Computer Science and Engineering (IoT)</i>	2024 – 2028 <i>CGPA: 9.04/10.00</i>
Global Indian International School, Jodhpur <i>Senior Secondary (Class XII)</i>	2022 – 2024 <i>87.8%</i>
Delhi Public School, Jodhpur <i>Secondary (Class X)</i>	2021 – 2022 <i>96.4%</i>

Internship Experience

Shah Softwares <i>Software Development Intern</i>	May 2026 – July 2026
- Collaborated closely with senior engineers to design and implement core CRM modules, actively participating in team meetings, technical discussions, and code reviews to enforce code quality. - Wrote clean, efficient, and maintainable code across the stack using React, TypeScript, and FastAPI, participating in debugging and testing to ensure high software performance. - Designed and integrated backend REST APIs with PostgreSQL/MySQL databases to seamlessly connect frontend user interfaces with server-side logic. - Participated in debugging, testing, and feature implementation across application modules. - Used Git and GitHub for version control and collaborative software development.	

Projects

AI-Powered Customer Support & FAQ Bot	<i>Python / FastAPI / LangChain / OpenAI API</i>
- Built an enterprise-grade retrieval-augmented generation (RAG) chatbot designed to automate responses for high-volume customer FAQs. - Processed and embedded unstructured documentation using OpenAI Text-Embeddings and vector indexing in Qdrant to deliver fast, context-aware answers. - Built a FastAPI backend featuring token usage tracking, response caching, and custom prompt guardrails to prevent hallucinations and keep responses bounded.	
Twitter Sentiment Analysis	<i>Python / NLTK / TextBlob / Pandas</i>
- Built a sentiment analysis application to classify tweets into Positive, Negative, and Neutral categories. - Performed text preprocessing and feature extraction using Natural Language Processing (NLP) techniques. - Implemented sentiment prediction using TextBlob and analyzed sentiment patterns across tweet data.	

Technical Skills

Languages	Java, Python, C++, C, JavaScript, SQL
Frontend	HTML5, CSS3, JavaScript (ES6+), React, TypeScript, Tailwind CSS
Backend	Node.js, FastAPI, REST APIs, .NET
Databases	MySQL, PostgreSQL, SQL
Core Concepts	Data Structures & Algorithms, OOP, DBMS, Git, GitHub, Testing & Debugging
Developer Tools	Git, GitHub
